# Print the certificate (10)

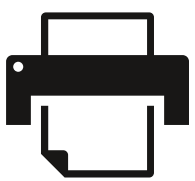

**How to get general type approval for use in your vehicle on public roads:** (11)

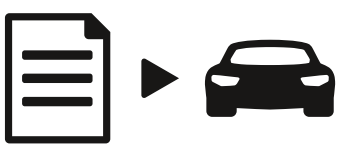

1. Scan the QR code on the top of the packaging to authenticate the product and download the certificate. (12) www.ultinon-germany.com
2. Print out the approval document (13)
3. Keep the approval certificate at all times with you in the vehicle. (14)
4. In countries where applicable, paste the sticker on the headlight unit in the engine compartment / under the handlebar. (15)

**You are responsible to comply with all applicable legal requirements.** (16)

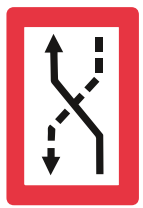

Approved for road traffic for selected countries and vehicle models only.
Check your country/vehicle at: ultinon-germany.com (17)

# General guidelines (18)

This LED replacement light source is only approved for right-hand traffic. Before entering a country with left-hand traffic, the LED lamp must be replaced by a halogen lamp. (19)

Please check car installation manual and follow instructions for lamp replacement. (20)

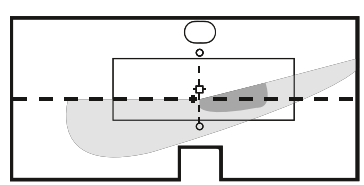

The LED light source and components must be mounted in a way that the headlamp won't be damaged and that its function is maintained. All parts must be fixed safely.

**Check correct position and safe fixation of LED lamp within the lamp holder.** (21)

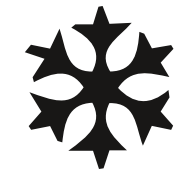

The replacement of the lamp in the headlamp requires inspection and eventually adjustment of headlamp setting by a qualified garage. (22)

# General guidelines – Safety (23)

The replacement of the halogen lamp by an LED light source may effect the deicing and defogging behavior of the headlamp. (24)

The LED light intensity is very high while turned on. Do not look directly into the beam to avoid damage to the eyes. (25)

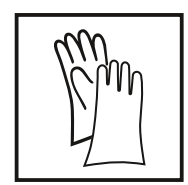

Please wear safety glassed while replacing halogen lamp. (26)

Lamps will heat up during operation. Do not touch. Please let it cool down in order to avoid potential injury due to contact with hot surface. (27)

Please wear safety gloves to avoid injuries during mounting. (28)

Keep out of reach of children. (29)
